DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-4 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claims 1 and 4, the “derived polymer” is vague because it is not defined.

Claims 2 and 3 are rejected because they are dependent claims.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (f) he did not himself invent the subject matter sought to be patented.

3. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 97/48,782.

The reference discloses a polymeric material comprising repeating units of aromatic mesogenic moiety. See the formula I on page 2 and the formula II on page 3.

The copolymer of formula III has two repeating units with aromatic ring in a main chain.

The reference polymeric material is degradable to fragments of low molecular weight,

Art Unit: 1756

which may itself facilitate bio-resorbability. Also, see the reference claims. The reference (inherently) anticipates the claimed invention.

4. Claim 1-4 and 8 are rejected under 35 U.S.C. 102(a)/(f) as being anticipated by Kaneko et al. (Macromolecular Rapid Communications, 2004, Vol. 25, pages 673-677).

The reference discloses a compound 4-hydroycinnamic acid is polymerized by melt polycondensation to yield a liquid crystalline biopolymer with UV. See the abstract and Figures 1 and 2. The reference (inherently) anticipates the claimed invention.

Response to Arguments

5. Applicant's arguments filed 1/26/06, with respect to the rejection in the previous Office Action has been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, new grounds of rejection are made in the sections 1 and 3 abovementioned.

Allowable Subject Matter

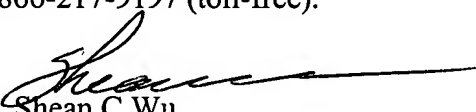

6. Claims 6 and 11-17 are allowed.
7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. JP 58-83080 differs from the present invention in that the present invention comprises an aromatic ring in a main chain. See the first and second formulae in JP '080, which hydroycinnamic acid derivatives comprise cyclohexenylene ring.
